Keep up to date with what is happening in the world!

Computing

Editing images. Think back to what you did last week. Take a series of photos on a smartphone / tablet and have a go at uploading them to a computer (if one is available). Sequence the photos in the correct order and apply different edits to the photos.

If you do not have a smartphone / tablet use the internet to find a series of photos.

If you do not have a computer available apply different edits using apps on the phone / tablet.

Science

Habitats of woodland animals. Thinking back to the research you did last week – design an appropriate habitat for a woodland animal. Once you have finished your design (making sure you label it) go outside and build your design.
